Dear Parents/Carers

St Anthony Autumn Term Curriculum Letter

This term, our topic will be 'Into the Woods'. This letter will give you some key information about what we will be learning this term and how you can support this learning at home. Please see below –

Subject	Content	Supporting your child home
Religious Education	During the first half of the term our topic is Creation and Covenant. We will be hearing the story of Noah, and the promise God made. We will also be learning how we become part of God's family through baptism. During the second half of the term our topic is Prophecy and Promise. We will be learning about the Visitation, Advent, the Magnificat and the Nativity.	Ask your child to retell Noah's story. If possible, show your child baptism photographs from your family. Discuss how as a church community we prepare for Christmas. Share the Christmas story with your child.
English	This term we will be reading the story 'Wolves' and through this, we will be exploring how information is presented. We will then use this to write a non-chronological leaflet. We will also be writing letters based on the book, 'Goldilocks and the Three Bears' focusing on character, descriptive vocabulary and sentence structures as well as focusing on our handwriting and letter formation. The children will continue to have a daily phonics lesson.	Talk about characters within the stories we are covering. Encourage your child to describe the main characters to you. When reading, ask your child to discuss what type of book they are reading, i.e. a fiction or non-fiction book. How do they know? Support your child with their fine motor skills as this will help to improve their handwriting. You can do this using playdough, sewing and drawing. www.phonicsplay.co.uk
Maths	This term we will be focusing on the children's ability to read and understand numbers to 100. They will use their growing understanding of place value to help them sort, compare and order numbers. The children will begin to develop their ability to count forwards and backwards efficiently in steps of 2, 3, 5, and 10. They will also be introduced to writing fact families of equations, and to relating addition and subtraction operations.	Practise counting to 100 Practise counting on and back from given numbers Encourage your child to count out objects around the house and making amounts using dried pasta. www.mymaths.co.uk www.bbc.co.uk/schools/ks1bitesize whiterosemaths.com/1-minute-maths (app)
Science	We will be investigating different materials and their properties. This topic will allow the children to compare and sort different materials using different terminology and to consider whether materials are fit for given purposes.	Discuss with your child the uses of different types of materials and how and why they are used e.g. glass for windows because it is transparent.

Mission Statement Motto: *Building relationships with God and each other, working hard in faith and hope to give our best in all things*

History	Our history topic this term will investigate how Belhus and Dilkes Park has changed over time. We will explore the fascinating history of the park and surrounding area and what has resulted in its change. The children will also develop their historical skills by learning about chronology and timelines, examining historical sources and understanding how they help us to find out about the past.	Talk to your child about Belhus and Dilkes Park and encourage them to ask questions about things they would want to know.
Geography	We will be encouraging the children to observe the key landmarks of our local area and visiting the local woods/park as part of this research. We will also be thinking about the human and physical features of our local area. We will be looking at a range of maps and plans and having a go at making our own.	When out and about, discuss some of the key landmarks of our local area such as the parks, church, library and shops. Think about your journey to and from school. What do you pass along the way?
Art and Design	In Art we will be developing formal elements of art: pattern, texture and tone. The children will create printed patterns using everyday objects; take rubbings using different media and learn how to make their drawings three dimensional.	Allow your child to practise art and design techniques using whatever media is available to them at home.
Design and Technology	Our topic this term is linked to our 'Into the Woods' topic. The children will design, create and evaluate a chair that could be built for baby bear from Goldilocks. They will consider the materials, shape, construction and mechanisms of their chair.	Encourage your child to talk about how chairs are constructed and the different types of chairs there are. Look at joining techniques used in chairs.
Music	In music, our theme is Hands, Feet and Heart. Children will develop their skills of listening, appraising, take part in musical activities and perform. They will also develop their understanding of the basic style indicators of South African music.	When you listen to music, try to tap along to the pulse, or make up body percussion actions to match the music. You might also enjoy singing songs with members of your family.
Physical Education	In our PE lessons we will be looking at developing the strength of our bodies by acting out the movements of yoga poses. We will put these movements together in sequences. In our outdoor PE sessions, we will be learning net and ball games and developing our ball control skills.	Try to do at least 10 minutes exercise a day e.g. trampolining, riding your bike or walking the dog.
PSHE	In PSHE the children will explore how they have been created and are loved by God. They will develop an understanding of the importance of valuing themselves.	Encourage your child to come home each day and share one thing that God would be proud of them for from the day.
Computing	This term in computing the children will be learning to understand what an algorithm is and create a computer program using an algorithm. They will then create a program using a given design and design an algorithm that follows a timed sequence. They will also learn about debugging and online safety.	Your child can practice their computing skills at home and encourage your children to understand the importance of being safe online.

PE Days – **Monday** and **Tuesday**. Please ensure you have removed your child's earrings on PE days. If your child uses their PE kit for an after-school activity, please make sure their kit is returned the following day. Please make sure every item of PE kit is named. The children will need a winter PE kit including a tracksuit.

Reading - It is extremely important that your child reads EVERY night. By reading daily, the children will be exposed to a range of authors and genres and this will help them to perform better in their own creative writing

Mission Statement Motto: *Building relationships with God and each other, working hard in faith and hope to give our best in all things*

tasks. Please can you sign the reading journal each time you listen to your child read with an expectation that your child will be listened to 5 times per week. Reading records must be in school every day.

Homework: Maths homework will be sent home on a Wednesday and returned on a Wednesday. English homework will be sent home on a Friday and returned the following Thursday.

If you have any queries or concerns, please email year2@holycrossprimary.thurrock.sch.uk

Thank you for your continued support.

Yours sincerely

Ms M Ellis and Mrs C Steele
Class Teachers
